NOTE: Estimates for New York State and New York City from 1978 to the current month are produced using time-series regression models from the U.S. Bureau of Labor Statistics.

Estimates for substate labor market areas (excluding New York City) are prepared through indirect estimation techniques. These techniques use available information without incurring the expense of a survey. Changes in the method of estimating substate areas caused breaks in the continuity of the data series. These breaks occurred during the following periods:

December 1977 to January 1978
 March 1988 to April 1988
 October 1989 to November 1989
 December 1989 to January 1990
 December 1993 to January 1994

Because of changes in methodology, data for the period preceding each break are not comparable to data for the period following each break.

For more information concerning the Local Area Unemployment Statistics (LAUS) program and a comprehensive listing of available data, please visit the New York State LAUS web page at: <http://www.labor.state.ny.us/html/laus/search.htm>

All data are not seasonally adjusted on 2002 benchmark.

r Revised

1 Primary Metropolitan Statistical Area. Includes the five boroughs of NYC plus Putnam, Rockland and Westchester counties.

Hispanic — Age 16 and over	550	49	413	40
Female				
All races — Age 16 and over	4,197	243	1,586	126
Age 16-19	198	32	52	13
Age 20 and over	3,999	211	1,534	114
White — Age 16 and over	3,248	156	911	66
Black — Age 16 and over	719	73	516	50
Hispanic — Age 16 and over	480	48	361	40

NOTE: Detail within subcategories may not add to totals due to rounding. Persons of Hispanic origin may also be counted as white or black. Changes in the estimation procedure affecting the Hispanic population were incorporated in the Current Population Survey in 1985. Data shown in this table reflect the changes and are not comparable to data published previous to 1985.

1 Not including institutional population.

Nondurable Goods	422.90	451.08	35.9	35.8	11.78	12.60

NOTE: Data based on 2002 benchmark.

- 1 Includes working foremen and all nonsupervisory workers engaged in processing, assembling, inspecting, receiving, packing, shipping, janitorial and watchman services, product development, auxiliary production, recordkeeping and other services closely associated with the above production operations. Excludes supervisory employees (above the working foreman level) and their clerical staffs, routemen and salesmen.
- 2 Includes all employing units except commercial and noncommercial farms, international governments and private households.
- 3 Data has been converted to the NAICS coding structure. (See notice in Glossary C.)
- 4 The average hours worked multiplied by average hourly earnings. Weekly earnings are affected not only by changes in average hourly earnings, but also by changes in length of the average work week, part-time work, stoppages for various reasons, labor turnover, absenteeism and overtime.

- 5 The average number of hours for which pay was received. Absenteeism, labor turnover, part-time work and stoppages cause average weekly hours to be lower than scheduled hours of work for an establishment. Overtime, of course, tends to increase the figures.
- 6 Obtained by dividing payrolls by the total number of hours worked. These averages are influenced by level of, and changes in, basic hourly and incentive rates, as well as such variable factors as amount of overtime and late-shift work, changes in pay for overtime and late-shift work and changes in output of workers on incentive plans. Payroll figures do not include such labor costs to the employer as irregular bonuses and retroactive pay. Average hourly earnings should not be confused with wage rates.

NOTE: Detail may not add to totals due to rounding.

r Revised.

p Preliminary.

1 Represents a measure of income received from all sources during the calendar year by residents of each State. Data excludes federal employees overseas and U.S. residents employed by private U.S. firms on temporary foreign assignment.

2 1996 dollars. Constant dollar estimates are computed by the U.S. Census Bureau using the national implicit price deflator for personal consumption expenditures from the Bureau of Economic Analysis. Any regional differences in the rate of inflation are not reflected in these constant dollar estimates.

NOTE: Data has been converted to the NAICS coding structure. See Glossary C on page 147.

1 Includes all employing units except commercial and noncommercial farms, international governments and private households. Nonfarm employment estimates include all nonfarm wage and salary workers who received pay for any part of the pay period including the 12th of the month. Persons on paid sick leave, paid holiday or paid vacation

are included, but those on leave without pay for the entire payroll period are excluded. Persons on the payroll of more than one establishment during the period are counted each time reported. Self-employed persons, unpaid family workers and domestics are excluded. Based on 2001 benchmark.

NOTE: Data based on 2002 benchmark. Detail will not add to totals, as not all detail is published.

1 Data has been converted to the NAICS coding structure. (See Glossary C on page 147.)

2 A manufacturing industry is an aggregation of establishments producing a single product or a closely related group of products. An

establishment that manufactures more than one product is classified by its most important product.

Wyoming	199	219	18	18	11	14	55	8	58	62

NOTE: United States totals differ from the sum of the state figures because of differing benchmarks among states and differing industrial and geographic stratifications.

r Revised.

a Includes mining, not shown separately.

b Includes mining with construction.

NOTE: Detail may not add to total due to rounding. Data based on 2002 benchmark.

a Represents less than 50 employees.

1 Data has been converted to the NAICS coding structure (See Glossary C on page 147).

2 New York PMSA includes New York City, Putnam, Rockland and Westchester counties.

3 New York City includes Bronx, Kings, New York, Queens and Richmond counties.

4 Rockland and Westchester areas do not meet the criteria for MSA but are considered a Labor Market Area (LMA).

5 Nassau-Suffolk PMSA includes Nassau and Suffolk counties.

6 Albany-Schenectady-Troy MSA consists of Albany, Montgomery, Rensselaer, Saratoga, Schenectady and Schoharie counties.

7 Binghamton MSA consists of Broome and Tioga counties.

8 Buffalo-Niagara Falls MSA consists of Erie and Niagara counties.

9 Dutchess County PMSA consists of Dutchess county.

10 Elmira MSA consists of Chemung county.

11 Glens Falls MSA consists of Warren and Washington counties.

12 Newburgh NY-PA PMSA consists of Orange County, NY and Pike County, PA.

13 Rochester MSA consists of Genesee, Livingston, Monroe, Ontario, Orleans and Wayne counties.

14 Syracuse MSA consists of Cayuga, Madison, Onondaga and Oswego counties.

15 Utica-Rome MSA consists of Herkimer and Oneida counties.

NOTE: The seasonal adjustment process attempts to remove from a time series all data variations that are due to recurring (seasonal) intrayear phenomena. The seasonal adjustments make nonseasonal developments, such as declines or increases in economic activity, easier to spot. Ten years of historical employment data are used as input to the seasonal adjustment model. Eleven supersectors are seasonally adjusted and aggregated to produce the seasonally adjusted totals for nonagricultural wage and salary employment. Prior adjustments for strikes and census hiring are included in the seasonal adjustment methodology.

NOTE: Contracts refer to awards made in year specified; expenditures relating to awards may extend over several years.

— Represents zero.

a Federal fiscal year ended September 30.

1 Military awards for supplies, services and construction. Net value of contracts of over \$25,000 for work in each state and District of Columbia. Figures reflect impact of prime contracting on State distribution of defense work. Often the state in which a prime contractor is located is not the state where the subcontracted work is done. Undistributed civilians and military personnel, their payrolls, and prime contract awards for performance in classified locations are excluded.

2 Payroll outlays include the gross earnings of civilian and active duty military personnel for services rendered to the government and for cash allowances for benefits. Excludes employer's share of employee

benefits, accrued military retirement benefits and most permanent change of station costs.

3 Civilian employees include United States citizen and foreign national direct hire civilians subject to Office of Management and Budget (OMB) ceiling controls and civilian personnel involved in civil functions in the United States. Excludes indirect hire civilians and those direct hire civilians not subject to OMB ceiling controls.

4 Military personnel include active duty personnel based ashore. Excludes personnel temporarily shore-based in a transient status, or afloat.

5 Undistributed civilians and military personnel, their payrolls, and prime contract awards for performance in classified locations are excluded.

Glossary C

Civilian Labor Force. All civilians in the noninstitutional population, 16 years of age and older, who are classified as either employed or unemployed.

Employed. All civilians who during the week including the 12th of the month (a) did any work for pay or profit (minimum: one hour's work) or (b) who worked 15 hours or more but who had jobs or businesses from which they were temporarily absent for noneconomic reasons such as illness, bad weather, vacation, labor-management dispute, or personal reasons, whether or not they were seeking other jobs. Each employed person is counted only once.

Unemployed. All civilians who did not work during the week including the 12th of the month who made specific efforts to find a job within the previous four weeks and who were available for work during the week except for temporary illness. Also included as unemployed are those who did not work at all, were available for work, and (a) were waiting to be called back to a job from which they had been laid off or (b) were waiting to report to a new wage or salary job within 30 days.

Rate of Unemployment. The total number of unemployed persons expressed as a percentage of the employed and unemployed, i.e., as a percentage of the civilian labor force.

Average Weekly Wages. The total annual payroll for supervisory as well as nonsupervisory workers divided by the average annual employment (sum of employment counts for each of the 12 months divided by 12) and this result divided by 52.

Average Weekly Hours. Represents total number of hours worked (including overtime) or paid for (including paid holiday, vacation, and sick leave hours) during a week divided by number of employees. The averages are affected by amount of labor turnover during a week, changes in amount of overtime hours, and by changes in ratio of full-time or part-time employment.

Average Hourly Earnings. Represents payrolls divided by total number of hours worked or paid for (including paid holiday, vacation, sick leave hours) during period reported. Total payroll includes both straight-time and premium pay. The averages are influenced by the amount of premium pay, as well as by changes in composition of labor force, changes in wage rates, upgrading of employees, etc., and consequently should not be interpreted as wage rates.

Average Weekly Earnings. Derived by multiplying weekly hours by average hourly earnings. Includes premium wages for overtime and night shift work and payments made on piece-work or incentive basis. The averages are affected by changes in length of workweek, part-time work, stoppages for varying causes, labor turnover, and absenteeism.

Reference Week of the Month. Employment, payrolls, hours, and earnings data are based on reports from firms covering a pay period, usually the week that includes the 12th of the month.

Nonagricultural Employment. Represents the number of full-time and part-time employees earning wages or salaries for the payroll period including the 12th of the month. Included are persons on paid vacations and on paid sick leave. Workers temporarily not earning wages because of labor-management

disputes, layoffs, or other reasons are not reported as employed. Persons on the payroll of more than one establishment during the same reference week are reported more than once.

Payrolls. All wages and salaries paid to individuals in insured employment during the calendar year.

Personal Income. The income received by persons from all sources, before deductions for income and other personal taxes, but after deductions for individuals' contributions to Social Security, government retirement and other social-insurance programs. It includes income received from business, Federal, State and local governments, households, institutions and foreign governments.

There are three basic types of income:

1. *Net labor and proprietors' income* includes wages and salaries (covering all employee earnings, including tips, bonuses, commissions and payments in kind); supplementary types of labor income such as employer contributions to social-insurance programs, compensation for injuries and pay while on military reserve duty; and the net business earnings of owners of unincorporated enterprises, including the independent professions and farms.
2. *Property income* includes rental income and the imputed rent of owner-occupied living quarters, dividends, interest and royalties.
3. *Transfer payments* consist of receipts of persons from government and business for which no services are currently rendered, such as: retirement; disability and health insurance benefits; unemployment insurance payments; food stamps; veteran's benefits; Supplemental Security Income; relief payments; and military pensions.

There are three sources of income:

1. *Government:* Income from governmental wages, salaries, pensions and unemployment benefits.
2. *Farm:* Income of proprietors, tenants and employees from operation of privately owned farms.
3. *Private nonfarm:* All personal income other than government and farm.

Personal Income Per Capita. The total personal income of residents divided by the resident population as of July 1.

Money Income. The amount of income received before deductions for personal income taxes, Social Security, bond purchases, union dues, Medicare deductions, etc. Receipts from the following sources are not included as money income: money received from the sale of property (unless the recipient was engaged in the business of selling such property, in which case the net proceeds would be counted as income from self-employment); the value of income "in kind" such as free living quarters or food produced and consumed in the home; withdrawal of bank deposits; money borrowed; tax refunds; exchange of money between relatives living in the same household; and gifts and lump-sum inheritances, insurance payments and other types of lump-sum receipts.

Current and Constant Dollars. Current dollar figures reflect prices prevailing during the specified period. Constant dollar figures are computed values that eliminate the effect of price

changes and are derived from prices of a specified base period. The constant dollar values are obtained by dividing current dollar values for a given period by the price indexes for the same period.

Metropolitan Statistical Area. A metropolitan statistical area (MSA) is defined according to a set of detailed standards prepared by the Federal Committee on MSAs. Under these standards, which were revised in 1980, areas are designated as an MSA in one of two ways: if there is a city of at least 50,000 population, or an urbanized area of at least 50,000 with a total metropolitan population of at least 100,000. In New York State, MSAs are defined in terms of entire counties. In addition to the county containing the main city, an MSA also includes additional counties having strong economic and social ties to the central county. If an area has more than 1 million population and meets certain other specified requirements, it will now be termed a Consolidated Metropolitan Statistical Area (CMSA), consisting of major components recognized as Primary Metropolitan Statistical Areas (PMSAs).

North American Industrial Classification System (NAICS). With the release of data in March 2003, NAICS replaced the Standard Industrial Classification (SIC) system and now serves as the new structure for classifying business activity in the United States. The SIC was developed in the 1930s, when the U.S. economy was manufacturing-dominated. Today's services-centered economy has rendered the classification structure of the SIC system obsolete, as the SIC often failed to adequately account for new and emerging industries. NAICS rectifies this shortcoming and, moreover, establishes consistent classification standards, meaning that, for the first time, industry data from Canada and Mexico can be compared with U.S. industry data. Some sectors or industries that share the same name under the SIC and NAICS will not have the same employment levels. For example, most publishing employment, which was classified as manufacturing under the SIC, has moved into a new NAICS supersector called *Information*. Similarly, manufacturing headquarters, which were classified under manufacturing in the SIC, are classified under *Management of Companies and Enterprises* under NAICS.
