TABLE C-7

**Employment Status of the Civilian Population¹ by Sex, Race, and Age
New York State and New York City — 2006**
(thousands)

	New York State		New York City	
	Employed	Unemployed	Employed	Unemployed
Both Sexes¹				
All races — Age 16 and over	9,043	421	3,546	181
Age 16-19	296	71	62	25
Age 20 and over	8,746	350	3,484	157
White — Age 16 and over	6,905	282	2,053	91
Age 16-19	245	49	34	10
Age 20 and over	6,661	233	2,019	81
Black — Age 16 and over	1,338	113	936	74
Age 16-19	38	18	20	12
Age 20 and over	1,301	95	916	62
Hispanic — Age 16 and over	1,300	79	870	56
Male				
All races — Age 16 and over	4,726	241	1,882	100
Age 16-19	133	40	27	15
Age 20 and over	4,593	201	1,855	85
White — Age 16 and over	3,667	163	1,125	54
Black — Age 16 and over	609	63	431	39
Hispanic — Age 16 and over	735	41	473	27
Female				
All races — Age 16 and over	4,317	180	1,664	81
Age 16-19	163	31	35	10
Age 20 and over	4,154	149	1,629	71
White — Age 16 and over	3,239	119	928	38
Black — Age 16 and over	729	51	506	36
Hispanic — Age 16 and over	565	38	397	29

NOTE: Detail within subcategories may not add to totals due to rounding. Persons of Hispanic origin may also be counted as white or black. Changes in the estimation procedure affecting the Hispanic population were incorporated in the Current Population Survey in 1985. Data shown in this table reflect the changes and are not comparable to data published previous to 1985.

1 Not including institutional population.

Durable Goods	637.48	590.91	36.7	35.9	17.37	16.46
Nondurable Goods	524.81	549.03	37.3	37.4	14.07	14.68

NOTE: Data based on 2006 benchmark.

- 1 Includes working foremen and all nonsupervisory workers engaged in processing, assembling, inspecting, receiving, packing, shipping, janitorial and watchman services, product development, auxiliary production, recordkeeping, and other services closely associated with the above production operations. Excludes supervisory employees (above the working foreman level) and their clerical staffs, routemen, and salesmen.
- 2 Includes all employing units except commercial and noncommercial farms, international governments, and private households.
- 3 The average hours worked multiplied by average hourly earnings. Weekly earnings are affected not only by changes in average hourly earnings, but also by changes in length of the average work week, part-time work, stoppages for various reasons, labor turnover, absenteeism, and overtime.
- 4 The average number of hours for which pay was received. Absenteeism, labor turnover, part-time work, and stoppages cause average

weekly hours to be lower than scheduled hours of work for an establishment. Overtime, of course, tends to increase the figures.

- 5 Obtained by dividing payrolls by the total number of hours worked. These averages are influenced by level of, and changes in, basic hourly and incentive rates, as well as such variable factors as amount of overtime and late-shift work, changes in pay for overtime and late-shift work, and changes in output of workers on incentive plans. Payroll figures do not include such labor costs to the employer as irregular bonuses and retroactive pay. Average hourly earnings should not be confused with wage rates.
- 6 Data have been converted to the NAICS coding structure. (See notice in Glossary C.)

r Revised.

p Preliminary.

1 Represents a measure of income received from all sources during the calendar year by residents of each State. Data exclude federal employees overseas and U.S. residents employed by private U.S. firms on temporary foreign assignment.

2 2000 dollars. Constant dollar estimates are computed by the U.S. Census Bureau using the national implicit price deflator for personal

consumption expenditures from the Bureau of Economic Analysis. Any regional differences in the rate of inflation are not reflected in these constant dollar estimates.

r Revised.

1 Includes all employing units except commercial and noncommercial farms, international governments, and private households. Nonfarm employment estimates include all nonfarm wage and salary workers who received pay for any part of the pay period including the 12th of the month. Persons on paid sick leave, paid holiday, or paid vacation

are included, but those on leave without pay for the entire payroll period are excluded. Persons on the payroll of more than one establishment during the period are counted each time reported. Self-employed persons, unpaid family workers, and domestics are excluded. Based on 2006 benchmark.

NOTE: United States totals differ from the sum of the state figures because of differing benchmarks among states and differing industrial and geographic stratifications.

1 Includes natural resources and mining, not shown separately.

2 Finance and insurance; real estate and rental and leasing.

3 Professional, scientific, and technical services; management of companies and enterprises; administrative, support, waste management, and remediation services.

4 Education services, health care, and social assistance.

5 Arts, entertainment, and recreation; accommodations and food services.

6 Includes repair and maintenance; personal and laundry services; and membership associations and organizations.

7 Natural resources and mining included with Construction.

8 Leisure and Hospitality excludes arts, entertainment, and recreation.

a Represents less than 50 employees.

1 Data have been converted to the NAICS coding structure (See notice in Glossary C).

2 New York City includes Bronx, Kings, New York, Queens, and Richmond counties.

3 Putnam-Rockland-Westchester includes Putnam, Rockland, and Westchester counties.

4 New York City and Putnam-Rockland-Westchester are part of the New York-Wayne-White Plains, NY-NJ Metropolitan Division.

5 Nassau-Suffolk Metropolitan Division includes Nassau and Suffolk counties.

6 Albany-Schenectady-Troy MSA consists of Albany, Rensselaer, Saratoga, Schenectady, and Schoharie counties.

7 Binghamton MSA consists of Broome and Tioga counties.

8 Buffalo-Niagara Falls MSA consists of Erie and Niagara counties.

9 Elmira MSA consists of Chemung county.

10 Glens Falls MSA consists of Warren and Washington counties.

11 Ithaca MSA consists of Tompkins county.

12 Kingston MSA consists of Ulster county.

13 Poughkeepsie-Newburgh-Middletown MSA consists of Dutchess and Orange counties.

14 Rochester MSA consists of Livingston, Monroe, Ontario, Orleans, and Wayne counties.

15 Syracuse MSA consists of Madison, Onondaga, and Oswego counties.

16 Utica-Rome MSA consists of Herkimer and Oneida counties.

NOTE: The seasonal adjustment process attempts to remove from a time series all data variations that are due to recurring (seasonal) intrayear phenomena. The seasonal adjustments make nonseasonal developments, such as declines or increases in economic activity, easier to spot. Ten years of historical employment data are used as input to the seasonal adjustment model. Twenty-one sectors are seasonally adjusted and aggregated to produce the seasonally adjusted totals for nonagricultural wage

and salary employment. Prior adjustments for strikes and census hiring are included in the seasonal adjustment methodology.

October	8,859	8,781	70	8
November	8,942	8,863	73	6
December	8,818	8,732	80	6

1 Claims where the Board made a finding during calendar year 2006 that (1) the claimant sustained an injury arising out of and in the course of employment; (2) timely notice thereof was given to the employer; and (3) there is a causal relationship between the work injury and a consequent disability. The claims accepted data for 2006 include some previously established claims for which a Board finding during calendar year 2006 amended or reaffirmed the claim's status; it is estimated that these affirmations account for less than 5 percent of the total.

2 Claims under the Workers' Compensation Law.

3 Claims under the Volunteer Firefighters' Benefit Law.

4 Claims under the Volunteer Ambulance Workers' Benefit Law.

NOTE: Contracts refer to awards made in year specified; expenditures relating to awards may extend over several years.

a Federal fiscal year ended September 30.

1 Military awards for supplies, services, and construction. Net value of contracts of over \$25,000 for work in each state and the District of Columbia. Figures reflect impact of prime contracting on state distribution of defense work. Often the state in which a prime contractor is located is not the state where the subcontracted work is done. Undistributed civilians and military personnel, their payrolls, and prime contract awards for performance in classified locations are excluded.

Glossary C

Civilian Labor Force. All civilians in the noninstitutional population, 16 years of age and older, who are classified as either employed or unemployed.

Employed. All civilians who during the week including the 12th of the month (a) did any work for pay or profit (minimum: one hour's work) or (b) who worked 15 hours or more but who had jobs or businesses from which they were temporarily absent for noneconomic reasons such as illness, bad weather, vacation, labor-management dispute, or personal reasons, whether or not they were seeking other jobs. Each employed person is counted only once.

Unemployed. All civilians who did not work during the week including the 12th of the month who made specific efforts to find a job within the previous four weeks and who were available for work during the week except for temporary illness. Also included as unemployed are those who did not work at all, were available for work, and (a) were waiting to be called back to a job from which they had been laid off or (b) were waiting to report to a new wage or salary job within 30 days.

Rate of Unemployment. The total number of unemployed persons expressed as a percentage of the employed and unemployed, i.e., as a percentage of the civilian labor force.

Average Weekly Wages. The total annual payroll for supervisory as well as nonsupervisory workers divided by the average annual employment (sum of employment counts for each of the 12 months divided by 12) and this result divided by 52.

Average Weekly Hours. Represents total number of hours worked (including overtime) or paid for (including paid holiday, vacation, and sick leave hours) during a week divided by number of employees. The averages are affected by amount of labor turnover during a week, changes in amount of overtime hours, and by changes in ratio of full-time or part-time employment.

Average Hourly Earnings. Represents payrolls divided by total number of hours worked or paid for (including paid holiday, vacation, sick leave hours) during period reported. Total payroll includes both straight-time and premium pay. The averages are influenced by the amount of premium pay, as well as by changes in composition of labor force, changes in wage rates, upgrading of employees, etc., and consequently should not be interpreted as wage rates.

Average Weekly Earnings. Derived by multiplying weekly hours by average hourly earnings. Includes premium wages for overtime and night shift work and payments made on piecework or incentive basis. The averages are affected by changes in length of workweek, part-time work, stoppages for varying causes, labor turnover, and absenteeism.

Reference Week of the Month. Employment, payrolls, hours, and earnings data are based on reports from firms covering a pay period, usually the week that includes the 12th of the month.

Nonagricultural Employment. Represents the number of full-time and part-time employees earning wages or salaries for the payroll period including the 12th of the month. Included are persons on paid vacations and on paid sick leave. Workers temporarily not earning wages because of labor-management disputes, layoffs, or other reasons are not reported as employed. Persons on the payroll of more than one establishment during the same reference week are reported more than once.

Payrolls. All wages and salaries paid to individuals in insured employment during the calendar year.

Personal Income. The income received by persons from all sources, before deductions for income and other personal taxes, but after deductions for individuals' contributions to Social Security, government retirement and other social-insurance programs. It includes income received from business, Federal, State and local governments, households, institutions and foreign governments.

There are three basic types of income:

1. *Net labor and proprietors' income* includes wages and salaries (covering all employee earnings, including tips, bonuses, commissions and payments in kind); supplementary types of labor income such as employer contributions to social-insurance programs, compensation for injuries and pay while on military reserve duty; and the net business earnings of owners of unincorporated enterprises, including the independent professions and farms.
2. *Property income* includes rental income and the imputed rent of owner-occupied living quarters, dividends, interest and royalties.
3. *Transfer payments* consist of receipts of persons from government and business for which no services are currently rendered, such as: retirement; disability and health insurance benefits; unemployment insurance payments; food stamps; veteran's benefits; Supplemental Security Income; relief payments; and military pensions.

There are three sources of income:

1. *Government:* Income from governmental wages, salaries, pensions and unemployment benefits.
2. *Farm:* Income of proprietors, tenants and employees from operation of privately owned farms.
3. *Private nonfarm:* All personal income other than government and farm.

Personal Income Per Capita. The total personal income of residents divided by the resident population as of July 1.

Money Income. The amount of income received before deductions for personal income taxes, Social Security, bond purchases, union dues, Medicare deductions, etc. Receipts from the following sources are not included as money income: money received from the sale of property (unless the recipient was engaged in the business of selling such property, in which case the net proceeds would be counted as income from self-employment); the value of income "in kind" such as free living quarters or food produced and consumed in the home; withdrawal of bank deposits; money borrowed; tax refunds; exchange of money between relatives living in the same household; and gifts and lump-sum inheritances, insurance payments and other types of lump-sum receipts.

Current and Constant Dollars. Current dollar figures reflect prices prevailing during the specified period. Constant dollar figures are computed values that eliminate the effect of price changes and are derived from prices of a specified base period. The constant dollar values are obtained by dividing current dollar values for a given period by the price indexes for the same period.

Metropolitan Statistical Area. A metropolitan statistical area (MSA) is defined according to a set of detailed standards prepared by the Federal Committee on MSAs under the authority of the U.S. Office of Management and Budget. Under these standards, which were revised in 1990, areas are designated as an MSA in one of two ways: if there is a city of at least 50,000 population, or an urbanized area of at least 50,000 with a total metropolitan population of at least 100,000. MSAs are defined in terms of entire counties. In addition to the county containing the main city, an MSA also includes additional counties having strong economic and social ties to the central county based on 1990 Census commuting data. If an area has more than 1 million population and meets certain other specified requirements, it will now be termed a Consolidated Metropolitan Statistical Area (CMSA), consisting of major components recognized as Primary Metropolitan Statistical Areas (PMSAs).

In 2000 the U.S. Office of Management and Budget issued new standards, which replaced the 1990s Metropolitan Statistical Area concepts with a new **Core Based Statistical Area (CBSA)** concept. Like the 1990s MSA concept, designated areas consist of entire counties having strong economic and social ties with each other around an urban core based on Census 2000 commuting data. However, there are now two primary types of areas: the **Metropolitan Statistical Area** — which should not be confused with the 1990s Metropolitan Statistical Area concept described above — is a county or group of counties around at least one urban core with at least 50,000 people; and the **Micropolitan Statistical Area**, which is a county or group of counties around at least one urban core with between 10,000 and 49,999 people.

Two additional types of areas are based on the Metropolitan Statistical Areas and Micropolitan Statistical Areas. **Combined Statistical Areas (CSA)** are Core Based Statistical Areas with moderately strong commuting ties between the areas, but not so strong that the areas could be merged into a single area. If a

Metropolitan Statistical Area has a single core with a population of at least 2.5 million people, it can be divided into **Metropolitan Divisions**. These Metropolitan Divisions consist of one or more counties representing an employment center plus other counties with strong commuting ties to the employment center.

The Office of Management and Budget designated the CBSAs on June 6, 2003. Statistical data referring to dates before that generally will be reported using the 1990s Metropolitan Statistical Area concepts. After a phase-in period that will vary by issuing agency, data referring to dates after that generally will be based on the CBSA designations. CBSA and MSA designations are listed in the Definitions and Abbreviations section of this book.

North American Industrial Classification System (NAICS). With the release of data in March 2003, NAICS replaced the Standard Industrial Classification (SIC) system and now serves as the new structure for classifying business activity in the United States. The SIC was developed in the 1930s, when the U.S. economy was manufacturing-dominated. Today's services-centered economy has rendered the classification structure of the SIC system obsolete, as the SIC often failed to adequately account for new and emerging industries. NAICS rectifies this shortcoming and, moreover, establishes consistent internal and international classification standards, meaning that, for the first time, industry data from Canada and Mexico can be compared with U.S. industry data. Some sectors or industries that share the same name under the SIC and NAICS will not have the same employment levels. For example, most publishing employment, which was classified as manufacturing under the SIC, has moved into a new NAICS sector called Information. Similarly, manufacturing headquarters, which were classified under manufacturing in the SIC, are classified under Management of Companies and Enterprises under NAICS. Additional information about NAICS including descriptions of the sectors is presented in Glossary B (pages 118-119).
