

Help using *New York State Statistical Yearbook* online files

Data tables on this website are presented in both Excel, for users who wish to download files that can be stored, organized and manipulated in a variety of ways; and in Acrobat portable document file format, for users who simply wish to view or print tables and graphics as they appear in the printed version of the *Yearbook*.

Data are available in two Excel formats: individual spreadsheets for each table or graph in the *Yearbook*; and a “master” spreadsheet for each of 15 sections of the book, with each section typically including more than a dozen individual spreadsheets.

The Acrobat portable document file format (.pdf) version of tables reflects the presentation of these tables in the print edition of the *Yearbook*. These files can be viewed and printed on any platform. A free viewer appropriate for your computer is needed to view an Acrobat document. You can download the appropriate viewer and instructions for installation from Adobe Systems at <http://www.adobe.com/products/acrobat/readstep.html>. This viewer can be used as a stand-alone or as a plug-in within a web browser to view documents as they are downloaded from the Internet. Instructions on using this software as a plug-in should be available with your web browser.
